

# 2025 Term 2 Reading & Thinking Skills for **OC Preparation**

**Saturday, 10 May 2025**

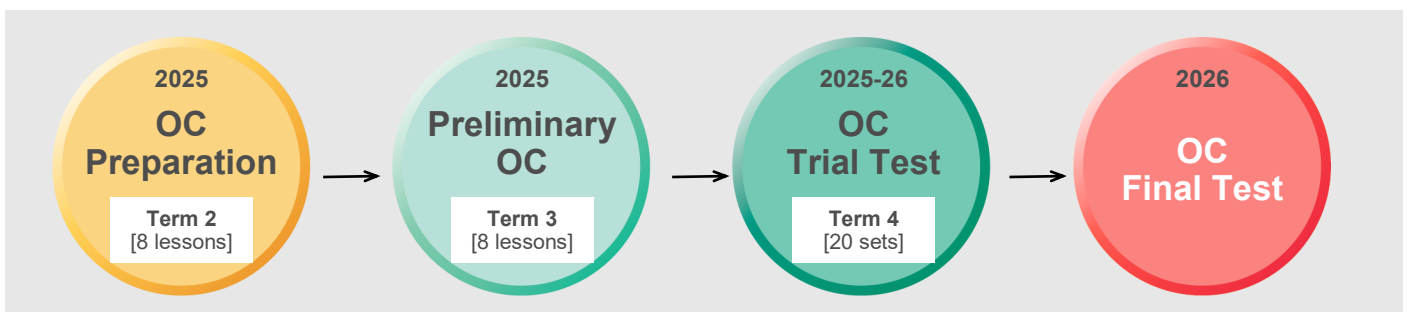

## Reading & Thinking Skills for OC Preparation

Prepare Early for the 2026 OC Test – Starting from Term 2

The OC Test will be held on **1 May 2026**. To help Year 3 students prepare effectively, CS Education is launching a dedicated **OC Preparation Course** starting in **Term 2**.

Subjects like **Reading** require consistent practice and time to build strong skills, while **Thinking Skills** is a new subject that many students are unfamiliar with. Early preparation is essential for success.

### 2025 - 2026 OC Course

## Prepare Early for the 2026 OC Test – Starting from Term 2

The OC Test will be held on 1 May 2026. To ensure Year 3 students are well-prepared, CS Education is launching a dedicated OC Preparation Course starting in Term 2. This specialized course will help build the skills necessary for success.

### 1. Targeted Reading Preparation

With the OC Reading test becoming increasingly challenging, it's essential to start preparing early. Reading skills require consistent practice, and this course will provide students with the tools to strengthen their abilities over time.

### 2. Introducing Thinking Skills

Thinking Skills is a new subject for many students. This course introduces various critical thinking and problem-solving techniques. Early exposure to Thinking Skills will give students an advantage in the OC Test.

### 3. Connection between Reading and Thinking Skills

Students will practice Thinking Skills questions related to Reading passages. This approach enhances their overall thinking abilities and prepares them for the challenging OC Test questions.

## Course Breakdown

#### •Weeks 1-6: Learning Phase

During the first six weeks, students will focus on mastering Reading and Thinking Skills through interactive lessons and practice exercises to build a strong foundation.

#### •Weeks 7-8: Test-Taking Phase

In the final two weeks, students will take practice tests under timed conditions, simulating the OC Test environment to improve their test-taking strategies and boost confidence.
